EDUCATION

NIMS University, Jaipur

Bachelor of Computer Applications (BCA) – Computer Science

Aug 2023 – Jun 2026

CGPA - 6.9

TECHNICAL SKILLS

- **Programming & Scripting:** Python, SQL.
- **Data Analysis & ML:** Pandas, NumPy, Scikit-learn, Statistical Analysis.
- **Databases:** MySQL, PostgreSQL, Query Optimization.
- **Data Visualization & BI:** Power BI, Matplotlib, Seaborn.
- **Analytics Tools:** Excel (Pivot Tables, VLOOKUP), ETL, Data Cleaning.
- **Productivity & Tools:** Google Colab, MySQL Workbench, Git.

EXPERIENCE

Data Analyst Intern

Dec 2025 – Jan 2026

Analytics Career Connect (ACC) – Remote

- Analyzed business datasets using Python (Pandas, NumPy) and SQL to extract actionable insights for strategic decisions.
- Built interactive Tableau dashboards visualizing KPIs, streamlining stakeholder data interpretation.
- Cleaned and preprocessed large datasets ensuring 99% data quality for downstream analysis.
- Implemented ETL workflows automating data extraction, reducing manual processing time significantly.
- Applied ML fundamentals to build predictive models using regression and classification algorithms.

PROJECTS

Zepto SQL Analysis | My SQL

- Designed and executed a comprehensive SQL-based analysis on Zepto's product and order dataset to uncover business insights.
- Wrote complex queries involving JOINS, window functions, and aggregations to analyze delivery performance, order trends, and product demand.
- Identified top-performing product categories and peak order hours, providing data-driven recommendations for inventory and delivery optimization.

Delhi Air Quality EDA | Python, Pandas, Matplotlib, Seaborn

- Performed end-to-end Exploratory Data Analysis on Delhi's historical air quality dataset covering pollutants like PM2.5, PM10, NO2, and CO.
- Handled missing values, outliers, and data inconsistencies to ensure clean, analysis-ready data using Pandas.
- Visualized seasonal AQI trends, pollutant correlations, and station-wise comparisons using Matplotlib and Seaborn to surface key environmental patterns.

Coffee Shop Sales Analysis | Excel, Pivot Tables, Charts

- Analyzed coffee shop transaction data across multiple store locations to identify revenue trends and top-selling products.
- Built dynamic Pivot Tables and charts to break down sales by product category, time of day, and day of week.
- Delivered an interactive Excel dashboard summarizing KPIs including total revenue, average order value, and month-over-month growth.

CORE STRENGTHS

Analytical thinking, Data storytelling, Dashboard design, Cross-functional collaboration, Business-oriented insights, Attention to data quality
